Concept Overview

RISK vs. REWARD is a high-stakes trivia game show where contestants don't just answer questions—they decide **how much each answer is worth**.

In the one-hour format, two contestants each face 12 multiple-choice questions. After seeing the question and all four answers, they use a dynamic **Risk/Reward Slider** to decide how much confidence to place in their answer—instantly seeing what they can win, what they can lose, and how the decision impacts their path to **\$1,000,000**.

A perfect game at maximum risk wins \$1 million. But there's no walk-away option: **every question must be answered, making every decision count**.

Knowledge gets you in the game. Confidence determines how far you go.

A deceptively easy question... worth a million dollars.
Would you know it – or hedge your bet?

RISK vs. REWARD

Question: 12 Category: Measurements

How many tablespoons are in one cup?

- A) 48
- B) 3
- C) 24
- D) 16

-\$318,226.45 RISK

REWARD \$466,330.08

Countdown: 46

If you miss...

Current Bank:	\$533,669.92
Minus RISK:	\$318,226.45
New Bank:	\$215,443.47
You Would Win:	\$215,443.47

If you are correct...

Current Bank:	\$533,669.92
Plus REWARD:	\$466,330.08
New Bank:	\$1,000,000.00
You Would Win:	\$1,000,000.00

Lock in Answer

How It Works

- Each contestant plays a complete game of 12 multiple-choice questions.
- No walking away – every question must be answered.
- They select a category from a board of available trivia topics.
- The question and four possible answers display
- They adjust the RISK/REWARD slider before each answer. Contestants see how every movement affects both the current question and remaining possibilities in their game.
- They lock in their answer and the RISK/REWARD setting.
- Timer locks in your answer and slider if time runs out
- One “Do-Over” lifeline is available during the first six question. If unused, they have a choice of two categories on the final question

RISK vs. REWARD

Question: 1 Category: Science
Light in which of these colors of the rainbow has the shortest wavelength?

☐ A) Green
☐ B) Yellow
☐ C) Red
☐ D) Blue

-\$86.65 RISK**REWARD \$0.00**

Countdown: 117

If you miss...

You now have:	\$533.67
Minus RISK:	\$86.65
You would have:	\$447.02
The Least You Can Win:	\$0.02
The Most You Can Win:	\$385,094.60

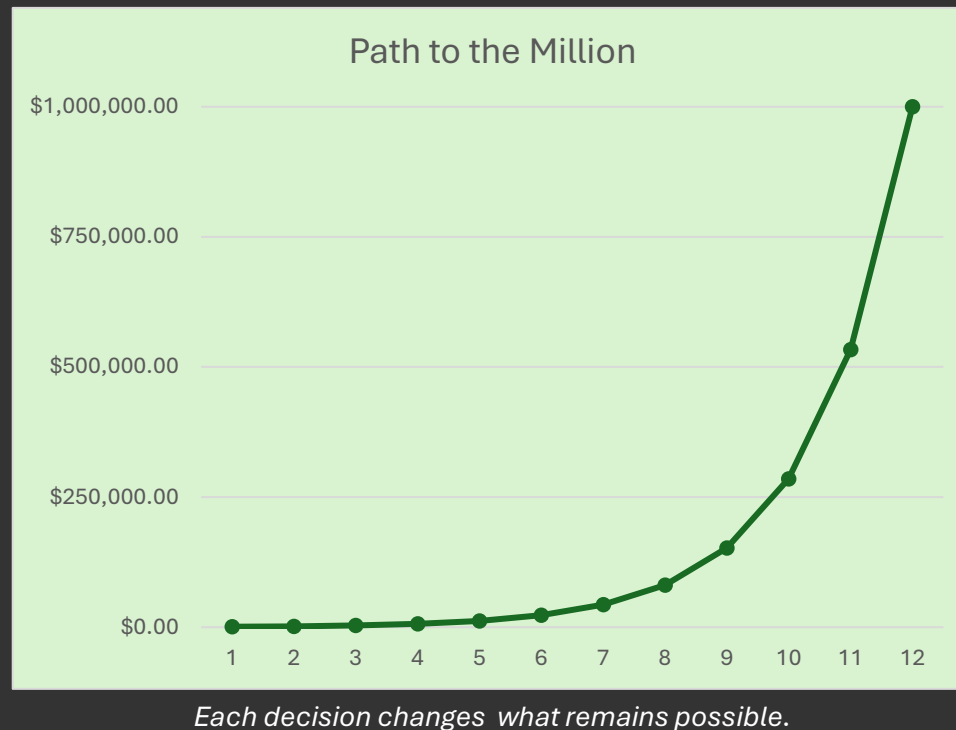

If you are correct...

You now have:	\$533.67
Plus REWARD:	\$0.00
You would have:	\$533.67
The Least You Can Win:	\$0.02
The Most You Can Win:	\$459,743.09

Lock in Answer

The Stakes

- RISK and REWARD values compound over time
- Early rounds build slowly
- Final rounds can spike dramatically
- One wrong answer can drastically reduce your total
- Strategic slider use is key to maximizing winnings
- Contestants see their best- and worst-case final totals update in real time

What Makes It Unique

- Slider Mechanic – Contestants control their own stakes
- Visible best- and worst-case trajectories update in real time
- Psychological Pressure – Strategy meets stress
- No Walk-Away Option – Every decision counts
- Compounding Rewards – Like interest, the stakes grow
- Couples Mode – Adds emotional tension and teamwork

Tone & Host

- Charismatic, lightly comedic host
- Balances tension with humor
- Keeps the energy high and the gameplay fun

“You start the game with \$533.67. The producer says that’s for putting up with me.”

“I wouldn’t worry about the money – I get paid the same no matter how you do.”

Audience & Appeal

- Viewers can answer questions and decide how they would set their slider
- Trivia fans, gamblers, strategists, and casual viewers
- Viewers love debating: “What would you have done?”
- Build-in social engagement and replay value

Set & Visual Style

- Sleek, modern set with a central slider control
- Real-time graphics show RISK, REWARD, and trajectory
- Countdown timer and dramatic lighting build tension
- Designed for high visual impact and audience immersion

Spin-Off Potential

- Couples Edition – Shared decision-making and drama
- Half-hour syndicated version with one contestant per episode
- International format potential with localized trivia

RISK vs. **REWARD**

*Knowing the answer is only half the game.
Confidence determines how far you go.*
